

Open-Source Release Agreement for the Project "Assistive Internet Navigation Device for People with Visual Impairments"

We, the undersigned members of the research team for the project titled "Co-design of an Assistive Internet Navigation Device for People with Visual Impairments" agree to release the source files of the project under a permissive open-source license.

By doing so, we understand that anyone can use, modify, and distribute the files without seeking our approval. We also voluntarily waive any moral rights we may have concerning the project to avoid any future approval requirements.

The source files include design files, schematics, and instructions on how to build and use a tactile interface and a Chrome browser extension to assist visually impaired screen reader users in navigating the Internet.

This Agreement signifies our mutual understanding and confirms our intention to release the source files of our project under a permissive open-source license.
